WORK EXPERIENCE

AISUSHI.GE

Kobuleti
Jun 2023 - Present

CEO

I founded the company AISUSHI, for which I created an online platform where I allow consumers to browse the menu and order online. Languages used on the site are: PHP, JavaScript, HTML, CSS

JAOKENI.GE

Remote
Mar 2023 - Present

Curator

I work under contract with Jaokeni, where I curate the front-end. I also monitor system administration

VRENT.GE

Tbilisi
Nov 2022 - Feb 2023

Full-Stack Developer

I have done an online room booking project that allows users to search and book a room. The languages used in the project are: Laravel, PHP, Javascript, CSS

SOUNDCLOUD.GE

Tbilisi
Mar 2021 - Jun 2022

Full-Stack Developer

We completed a project that allowed users to listen, download and buy music, and a site that allowed producers to publish free and paid works. The site was developed for the following platforms: Web, iOS, Android and Windows

EDUCATION

IT COMPUTER ACADEMY

Batumi
2014

High school diploma

I completed a 2-year course on IT computer science, where I studied the principles and features of computer work.

SELF DEVELOPMENT

2009

My first interaction with code as a child was in 2009, at the age of 13. From day one, I was very interested in what was happening on the back end, how the site worked, how the code was written and what powered it. I immediately started searching for information and deepening my knowledge, which continues to this day.
